

HyperLoc

I am upgrading my workstation with a new computer, how do I transfer my HyperLoc license to the new workstation?

Activation Reissues:

From time to time we understand that your workstation hardware might change.

Within

reasonable limits we will reissue activations in line with what we consider to be fair usage. Send us your old MAC address and your new MAC address and we will work to change the license to the new one.

Unique solution ID: #1531
